25 March 2010

Dear Mr Bentley,

I refer to your application for your software, EDSL TAS v9.1.4 DSM class software, for Part L compliance and EPC production, to be approved, and to interface to the latest version of EPCGen (v3.5.a.0), as part of the methodology of the calculation of the energy performance of buildings.

Having considered the information provided by you, and having had the software tested by AECOM, as set out in the attached letter, I am satisfied that the software meets the criteria which have been developed for the approval of DSM software interfaces.

I am authorised by the Secretary of State to confirm that EDSL TAS v9.1.4 DSM class software has been approved, to form part of the methodology of the calculation and expression of the energy performance of buildings for the purposes of regulation 17A of the Building Regulations 2000.

This approval only relates to EDSL TAS v9.1.4 DSM class software and any later variant or version of your software will need to be submitted separately for approval.

A copy of the Faber Maunsell letter is attached for ease of reference.

Yours sincerely,

A handwritten signature in black ink, appearing to read "Andy De Lord", written in a cursive style with a long horizontal flourish extending to the right.

**ANDY DE LORD**

Enc. AECOM (5 March 2010)
